DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to a warehouse/on demand access to inventory, classified in class 705, subclass 22.
 - II. Claims 25-45, drawn to a method of inventory management, classified in class 705, subclass 28.
 - III. Claims 46-55, drawn to a system for inventory management, classified in class 709, subclass 223.
 - IV. Claims 56-67, drawn to a computer readable medium, classified in class 700, subclass 214.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of claim 1 may be practiced by hand, pen and paper. Also, the apparatus can be used to practice a stock trading system.

3. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of claim 1 can be practiced by hand. Also, the apparatus can be used to practice the process of implementing a point-of-sale inventory monitor.

4. Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Groups I, II & III) as claimed does not require the particulars of the subcombination (Group IV) as claimed because the computer network need not use a particular computer code. Portions of Group I may be carried out by hand. Also, the subcombination has separate utility such as a bank statement reconciliation.

5. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group III has separate utility such as a hierarchical file utility database. See MPEP § 806.05(d).

Art Unit: 3627

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for either of Groups II, III or IV, restriction for examination purposes as indicated is proper.

8. A telephone call was made by Andrew Liao to Marc A. Hubbard (Reg. No. 32,506) on or about August 12, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Joseph Rudy whose telephone number is 703-308-7808. The examiner can normally be reached on Tuesday thru Friday, 7:30 a.m until 6 p.m..
